Washington, DC 20554

Dear The Federal Communications Commission,

First and foremost, there are millions of hard-working americans out here, like yourself, who are struggling to get by. I myself work very hard to pay the rent and barely pay the bills, i work 40 hour weeks and i am barely making it. i don't have a car, or family or friends to rely on like most people, i walk to work, and it seems i work for nothing, really, i never have extra money, but, when i bought this phone i thought it was the most affordable phone there was and the plan was just perfect for me, i do not use the phone that much except in emergency situations, or when a freind needs to get ahold of me while i am at work or away from home. Charging more isn't going to keep customers, i believe sales would drop as much as 30% if u elect this act.

Under the flat fee or numbers-based plan you are considering, people like me who make few long distance calls would pay the same as people or businesses that make many calls. I believe it would be unfair to charge low-volume and residential customers the same fees as high-volume residential or business customers.

I urge you to keep the USF fair, and adopt the Fair Share Plan. Thank you, and best of luck in your new position.

cc: Marlene Dortch, Secretary

Sincerely,

E S
